

PRODUCT INFORMATION SHEET

Carpenter square

Product description

Roofing square used in the construction of wooden roof structures and other carpentry work. It has designations that facilitate, among others, cutting rafters in rafter framing. Also useful when outlining parallel lines, which makes it an ideal tool for other standard carpentry work. This tool can be used to set angles in mitre saws. Intended for professional applications.

Characteristics

- durable, aluminium body;
- polished and lacquered surface, resistant to external factors;
- foot that enables precise arranging of the square in relation to the measured element;
- embossed inch scale.
